

Innovate, foster loyalty, perform

Wherever you are in the world....

Remote management of operational excellence should be business-as-usual. Yet companies still turn to spreadsheets to manage **key performance indicators (KPIs)** across multiple geographies, compromising from the start their chances of success.

Introducing PRESTO Digital Enterprise, the **all-in-one business governance solution** giving your leadership team real-time, top-down visibility to the required information to accelerate the decision making process while taking your company to its next growth destination. Our enterprise software

gives a 360° visibility into all core areas of business operations to help multi-site organizations collaborate effectively to achieve more of their goals, faster and with less effort.

Deploy strategy & measure results

Realize the leadership vision through a set of linked strategies and effectively measure the progresses towards each strategic objective. For a perfectly aligned organization.

Engage senior management in tactics

Equip your leaders with crisp, real-time visibility into issues and areas of risk with a wide set of KPI reporting and analytics. For an accelerated decision making process

Empower team leaders to act in real time

Automate KPI scheduling to ensure daily discipline in keeping data fresh while linking trends in performance to current operational issues. For maximum sense of urgency & ownership

Make money & save money

Reduce admin duties and manual processing risks and identify in a timely manner improvement opportunities. For a truly agile and digitized organization.
